## **Cold Regions Lab Offers Summer Tours**

**HANOVER, N.H.**—Summer tours of the U.S. Army Cold Regions Research and Engineering Laboratory (CRREL) located at 72 Lyme Road, Hanover, N.H., will be held during July and August. The tour schedule is Tuesdays at 1:30 p.m. and on Wednesdays at 6:00 p.m. starting on Tuesday, July 7, and ending on Wednesday, August 26.

The general public tours will be centered around the Main Laboratory cold rooms and the Ice Engineering Research Facility. The Ice Engineering Research Facility houses three large cold rooms and is a hands-on research facility where they conduct wide-ranging experiments from rip rap studies to modeling navigation.

CRREL's mission is to gain knowledge of the cold regions through scientific and engineering research, and to put that knowledge to work for the Corps of Engineers, the Army, the Department of Defense, and the Nation. CRREL, based in Hanover, New Hampshire, with a field office in Fairbanks, Alaska, is DoDs only laboratory addressing problems and opportunities unique to the world's cold regions.

There are group size limitations; therefore, those interested in participating in a tour should contact the Public Affairs Office at (603) 646-4292 to make reservations. In addition, we encourage those visiting the Lab to bring a light jacket or sweater.

More information may be obtained by contacting Ms. Marie Darling at (603) 646-4292 or email: [mdarling@crrel.usace.army.mil](mailto:mdarling@crrel.usace.army.mil).
